MICHELIN® X® TWEEL® TURF™
The Airless Radial Tire™ & wheel assembly. Designed for use on zero turn radius mowers.

✓ NO MAINTENANCE
✓ NO COMPROMISE
✓ NO DOWNTIME
**MICHELIN® X® TWEEL® TURF**

**No Maintenance** – MICHELIN® X® TWEEL® TURF™ is one single unit, replacing the current tire/wheel/valve assembly. Once they are bolted on, there is no air pressure to maintain, and the common problem of unseated beads is completely eliminated.

**No Compromise** – MICHELIN X TWEEL TURF has a consistent hub height which ensures the mower deck produces an even cut, while the full-width poly-resin spokes provide excellent lateral stability for outstanding side hill performance. The unique design of the spokes helps dampen the ride for enhanced operator comfort, even when navigating over curbs and other bumps. High performance compounds and an efficient contact patch offer a long wear life that is two to three times that of a pneumatic tire at equal tread depth.

**No Downtime** – MICHELIN X TWEEL TURF performs like a pneumatic tire, but without the risk and costly downtime associated with flat tires and unseated beads.

---

**Zero degree belts and proprietary design provide great lateral stiffness, while resisting damage and absorbing impacts.**

**High strength, poly-resin spokes carry the load and absorb impacts, while damping the ride and providing a unique energy transfer that reduces “bounce.”**

**Heavy gauge steel with 4 bolt hub pattern fits on a variety of popular mowers.**
